

# Structured Cabling Services

## MAJOR BENEFITS

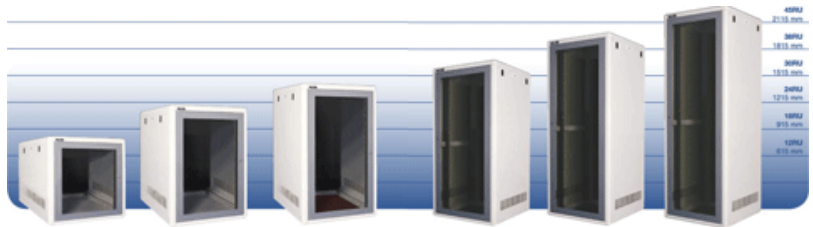

Partnerships with experienced data cabling companies means Citcom can supply all your cabling needs including...

- ✓ Racks and Cabinets
- ✓ Patch Cables
- ✓ Structured Cabling
- ✓ Additional Outlets
- ✓ Installation Service
- ✓ Cable Testing
- ✓ Consultancy

Citcom have partnered with Multilink Consultants to provide a complete "ground-up" solution for either new structured cabling installations, or simply to add further outlets to an existing office.

The team of experienced cabling technicians will visit on site which will result in a complete costing and design to meet your cabling requirements.

In addition to Multilink Consultants we have relationships with a number of leading vendors of cabinets, racks, patch cables and leads which can be installed by our own engineers.

CABINETS AND RACKS

CABLES & CONNECTORS

Citcom can also supply a complete range of cables, fibre optic connectors patch leads, printer network interfaces, USB cables and more...

Call any of the team at Citcom to discuss your own specific needs and requirements for **Cabling Requirements** and see how this solution could save you time and money as your business grows.

## **ABOUT CITCOM**

Two directors formed Citcom with the focus of providing total Information Technology Services and Solutions to New Zealand Businesses that are unique and affordable.

With one director having developed a number of network support, hardware maintenance, disaster recovery and total outsourcing agreements and the other director having developed relationships with most of the major IT vendors, they bring to your organization a wealth of experience.

With this industry experience, totaling more than 30 years, they bring the expertise and knowledge that comes from a firm understanding of New Zealand business environments and the application of IT solutions to solving them.

Combine the directors experience with that of a highly trained and experienced engineering team and you have an IT company which can confidently provide only the highest level of technical and support advice.

Citcom specialize in the small to medium business market within New Zealand so whether you are looking for a single source for all your IT services, or a larger company looking for a reliable and economical solutions provider, Citcom have the experience you need.

## **CITCOM GENERAL SERVICES**

Following is a brief overview of some of the services Citcom can offer you business:

### **CALL CENTRE & HELP DESK SUPPORT**

Citcom have a dedicated team of experienced engineers and call centre personnel who can manage calls and provide technical support.

### **ON SITE ENGINEERING SUPPORT**

Our certified and experienced engineers are available to provide efficient and effective resolutions for all your network issues.

### **HARWARE SUPPORT**

Part of our relationships with major vendors is the ability for Citcom to provide hardware support or warranty repairs for PCs, printers etc. either on site or return to base.

### **HARDWARE & SOFTWARE SOLUTIONS**

"Best of Breed" solutions from the leading IT Vendors so you can be assured of on-going support for both now and into the future.

### **NETWORK PREVENTAIVE MAINTENANCE**

Citcom can provide a support solution that can ensure your servers and PCs are maintained to optimum performance.

### **NETWORK DESIGN & IMPLEMENTATION**

By constant research we design and deliver the best solutions which are specific for our clients ever changing needs.

### **BUSINESS CONTINUITY SERVICES**

Business Continuity Planning is our specialties. Our team can put a specific plan together to ensure your business is up and running quickly in the event of any major system failure.

### **DISASTER RECOVERY PLANNING**

Just as important as Business Continuity is Disaster Recovery Planning. Citcom can help your business plan for events such as fires, floods, earthquakes etc.

### **STUCTURED CABLING**

Citcom can provide the range from complete "Ground Up" structured cabling installations through to just adding additional outlets.

### **LAN & WAN SOLUTIONS**

As well as having close relations with major solution providers we work closely with all major communication companies to put the most effective and economical solution together.
